

What is the North Redlands Tree Canopy Project?

This project hopes to increase tree canopy in North Redlands through a community inspired approach where you can pick your own free tree to be planted in your yard.

Why should I plant a tree in my yard or easement?

Planting a tree in your yard or easement can increase property value and provide welcomed shade during a hot summer day.

Is the tree really free and how will I take care of it?

One of our UC Master Gardeners will help you pick the right tree for you and it is 100% free! Additionally we will be providing workshops and monthly check-ins.

What if I'm a renter, not a homeowner?

It doesn't matter if you are a renter or home owner we want all members of the community included so if you can't take a tree, how about a native plant?

How do I sign up?

Please visit iercd.org/climate-corps for details on how you can get your own tree!
